Kansas City Woodworkers' Guild

PUBLISHED BY THE KANSAS CITY WOODWORKERS GUILD * 3189 MERCIER ST * KANSAS CITY * MO * 64111

ANNUAL MEMBERSHIP DUES CHANGES

The website is up and accepting your renewals. If you want to renew at the meeting – we do accept credit cards but it is the slowest option – it can become a real bottle neck at the meeting. If you want to speed things up – a check or cash (exact change helps) are the best ways to go.

Changes to Membership Dues for 2019

There is an increase in dues for 2019 for those members who use the shop. Here is the new dues structure:

Membership Level	\$/yr
Benefactor	\$150
Woodworker Plus	\$125
Sawdust Maker	\$95
Regular	\$50
Senior	\$35
Student	\$25

This represents a \$25.00 annual increase for Benefactor and Woodworker Plus, a \$20.00

- annual increase for Sawdust Maker, and no change for Regular, Senior, and Student.
- We will maintain the 20% discount on Guild classes and merchandise for WW+ and Benefactor members.
- We will continue the \$5.00 discount for renewals between December 1, 2018 and January 31, 2019.

There is one more significant change – **the renewal period is being shortened this year. To maintain your membership and Green card status you must renew by February 28, 2019. After February 28th, you will be considered a new member and will need to re-qualify for your Green Badge.**

Even with the dues increase – membership in the Guild is still one of the best deals around. If you want to arrange for a gift membership – see Wayne Peterson or Joseph Greisen.

Wayne Peterson
Membership Director

CNC UPDATE

Great News! The CNC will be back in the shop for the Wednesday January 23rd CNC SIG meeting. The meeting will start at 6:00 PM. There will be a presentation on the operation of the upgraded CNC, followed by demonstrations. The number of demonstrations will depend on the number of members that show up.

The presentation and demonstration will not cover the programing or operation of the Vectric software VCarve or Aspire. To get the most out of this meeting the member should be proficient in the creation and preview of a toolpath.

Creating a project using the CNC will be divided into two steps. Step one is programing the software (VCarve or Aspire) to create the toolpath needed. The programing will be done in the Guild library or at home. MakerSpace will be used to create the toolpath in the library if the project was created at home. The toolpath will be placed on a flash drive and that will be taken to the CNC room.

Step two the flash drive will be uploaded to the CNC and run.

The procedure to upload and run the CNC will be the main topic for the January 23rd meeting.

The reason for dividing the programing from running the CNC is to allow more than one member to create a project while another is using the CNC. It will decrease congestion in the CNC room.

We will also set up a schedule to insure everyone is trained on operating the CNC before they can use it.

See you on the 23rd.

Gary Mielke

WOOD WORDS NOW ACCEPTING OUTSIDE ADVERTISING

Recently we've received a few requests to place business advertising in the monthly newsletter by non-member businesses. Along that line and in an effort to raise some additional revenue for the guild, we've come up with a rate sheet that can be used for ad placement.

We have accepted ads from many of our various sponsors, in the past, and we will continue to offer sponsors ad placement based on the level of their sponsorship.

Regarding non-sponsors, accepting appropriate ads from outside businesses offers us an opportunity to create a new revenue source and gives us the chance to make the newsletter self-supporting and offer us the opportunity to implement improvements that might be difficult to do without having a supporting revenue source.

We are accepting our first ad customer beginning with the February issue of Wood Words. This particular advertising is a non-sponsor guild member who will be promoting his business through Wood Words and will be offering to make additional financial contributions to the guild when our members take advantage of and make purchases through his business.

Should you have or know of someone who would benefit from advertising in Wood Words, please refer them to me. Below are our ad rates and all ads will be subject to our approval and review.

AD SIZE	ONE TIME RATE	YEARLY RATE
BUSINESS CARD 1/8 PAGE	\$ 25.00	\$ 200.00
1/4 PAGE.....	\$ 60.00	\$ 350.00
1/2 PAGE.....	\$ 75.00	\$ 600.00
FULL PAGE.....	\$ 100.00	\$ 1000.00

Thanks, Ron Haw

TECH SAVVY EVENTS VOLUNTEER NEEDED

Our Events Director is looking for a person to assist with marketing and promoting various events through various media, mainly social media. Creating flyers and campaigning to various places, so our events can get more publicity, and more attendance.

So...If Your Are Savvy with Facebook and Instagram. If You Can Help to Promote Guild Events? If You have an Idea to Drive Attendance to Events? There is a position available where the guild could use your help! Inquire with our Events Director, Alex Scott at events@kcwoodworkersguild.org about Events Marketing and Promotion!

TREASURER'S REPORT

FINANCIAL UPDATE

The financial books for 2018 are closed and the planning for 2019 is well on its way. The Guild ended the year in a financially sound position. Net assets total over \$100 thousand in cash and CD's.

If you're interested in detail that's on the website in the "Members Only" section. The section contains monthly financial activity, year-end financial statements, a financial audit by a CPA firm of the 2017 records and reporting. Please review any or all the material and bring questions to me individually or at the next membership meeting.

During the year the Guild upgraded the electrical system by increasing the amount of power coming into the shop. New dust collection duct work was also installed,

and a new drill press was purchased. We also spent a great deal of effort in training and keeping the shop open and equipment running.

On the challenging side, our turf box customer has become less reliable. Revenue is way down for the year and there are indications it will not come back. To make up for the lost revenue and to insure the Guild remains financially sound membership fees were increased for 2019. This is the first increase in membership fees since the Guild moved to the present location eight years ago.

Hope you all had a Happy New Year and let's have an even better 2019.

Gary Mielke
Treasurer

MY GOAL FOR 2019: ABS

Happy New Year to the Guild! The start of a year is a common time to reflect. Looking back on 2018 I am pleased with what we have accomplished on the training team. At the beginning of 2018, I set a goal of having 50 classes available in the guild for 2019. Thanks to a lot of dedicated, talented, and caring volunteers, we exceeded that number and ended up offering 65 classes providing learning opportunities to 520 students. We will need to see what 2019 brings. I like last year's numbers, and space and shop usage may be difficult for us to increase the number of classes that we offer. But if we can find a way, we will continue to look for more ways to teach woodworking.

Last year I remember one of our guild colleagues saying that their goal for the new year was to create plans for everything that he was going to build. He figured that if he could draw it, he could build it. I was also reading the Mike Pekovich book *The Why &*

How of Woodworking: A Simple Approach to Making Meaningful Work and in this book, he talks about always sketching designs. He does thumbnail sketches and will start with a shape, a rectangle for example, and then add and adjust elements to the shape until he finds a design that appeals. Think of all the wood that he saved just by trying a project on pencil and paper first rather than building in wood.

I found that the same was true for me when drawing out design plans. I like to use Sketchup when I start a new project. I cannot remember how many times I had a rail too short or a top too wide. All fixed in the drawing, even before I cut a board. It has saved me quite a bit of time, money, and frustration.

Personal goals for 2019 will be to improve my understanding of Sketchup and to start making thumbnail design sketches to see if I can

come up with some new pieces that I will be happy looking at every day in my home. My mantra for this year is going to be **ABS: Always Be Sketching.**

To tie all this back into my post about training, classes for 2019, and adding to our class experience, we are looking for someone who is comfortable in Sketchup and feels that they can share that knowledge with some fellow woodworkers. The class would be for people that have never used Sketchup or those that have tried and left frustrated with the experience. Please let me know if you think that this is something you could offer the guild.

Until next month, keep the sawdust flying and your sketching pencil sharp!

Training

ELEGANCE IN WOOD SHOW ANNOUNCES THIRD JUDGE TO JOIN EVENT TEAM

BY JIM BROCK

I'm happy to announce that plans are coming together for our upcoming Elegance in Wood Show and Sale being held at the John Knox Pavilion in Lee's Summit Missouri on March 15/16, 2019. Spread the word and bring the family!

We have secured our third judge and are pleased to announce that Carlan Honaker from Topeka, Kansas, will join our judging staff. Carlan is a member of the Topeka Carving Club and has judged several shows. He's been carving for over 70 years and is now an instructor who has several commissioned pieces on display around Topeka, including at the governor's mansion. We look forward to his experience and expertise.

For anyone still on the fence about signing up as an exhibitor, don't forget that we are having a Swap Meet table again after its resounding success last year. Open to registered exhibitors only, this gesture of appreciation will allow you to recoup some, and possibly all, the costs of purchasing a table at the Show. Please see here for more details, and if you need any additional information don't hesitate to call or email me.

ROUGH TO READY INSTRUCTORS STEP UP & PROVIDE A RECORD NUMBER OF CLASSES IN JANUARY '19

We are off to an ambitious start in 2019. The Rough to Ready Instructors have answered the call to hold a total of twelve Rough to Ready classes in January. This is a huge commitment of time by our instructors. An average class is completed in about six hours. This is a pace that has previously not been met and so far in 2019 represents a total of seventy two instruction hours. As program coordinator for this safety certification/skill building class I extend my personal thanks to: John Sloss, Denny Walton, Laura Provance, Alex Scott, Mike McCauley and myself. These folks have stepped up to work with mostly our newest members without complaint as early as 7:00 am on some mornings and have found themselves locking the doors after a class has just ended late in the evening at 11:00 pm.

Joining the instructor team at the end of December, I'd like to introduce Larry Welling as the newest member of the Rough to Ready team. Larry is an accomplished woodworker and I'm sure you will remember seeing his amazing abstract wood art designs at the monthly meeting Show-n-Tell presentations in the past.

To all of our new members, I want to invite you to experience the Rough to Ready class. You will be introduced to and have a chance to actually operate the majority of the stationary power tools in the shop. Rough to Ready is also open to members who have already earned their safety certification tag (green tag) but would like to broaden their shop skills. As of this writing there is only one January class spot available, but February has several class spots available and March classes will be posted soon. But don't wait too long, classes fill up fast!

Thanks for your interest, Ron Haw

2019 NOMINATING COMMITTEE FOR BOARD AND DIRECTOR ELECTIONS

Tim Locke, KCWG Member at Large seeks volunteers to form a nomination committee for Guild Board and Guild Director replacements and new nominees. As specified in our bylaws, the Guild Director elections for the odd year are as follows:

- “d. These Directors shall be elected by the membership at the annual April meeting and will take office at the May Leadership Committee meeting.
- e. The term of office is two (2) years. All Directors may be elected for a

second term with a maximum of two consecutive terms holding the same office, unless a quorum vote is taken by the membership to allow a Director to continue in their position.

f. To ensure continuity of the Guild leadership, no more than 50% of the Director positions will be replaced in the same year. The Assets, Events, Programs, and Sponsorship Directors will be replaced in odd years”

The Guild also has an opening in the next election for two Board positions. After election to the Guild Board

the new members of the Board are typically nominated to Guild officer positions of Secretary and Treasurer.

The Nominating Committee will be requested to nominate members to the above open positions. The 2018 Nominating committee performed an excellent job of selecting nominees. If you are interested in serving on the nominating Committee please contact Tim Locke, Member at Large; MemberAtLarge@kcwoodworkersguild.org; Tim@lockeami.com; 816 392 9889 cell.

AN EYE ON SAFETY

As our new Director of Safety, I find myself back in the mix in a leadership role. I must say, most of the “heavy-lifting” has been done by our previous director, John Sloss, so many thanks to John for his tireless leadership. The entire safety committee wishes to thank John for his last 2 years of leadership. A lot was accomplished under John.

As I take over as Director, I also want to recognize Laura Provance for volunteering to help me in my role. Laura has agreed to serve as a “co-chair” of the committee, giving me the opportunity to have her available for a variety of duties in my absence or to assist me with the administrative duties

of the role. I’m really thankful for Laura being willing to step in to help keep our committee going with fresh ideas from a “young” perspective. Thank you Laura!

As we move full speed into 2019, I am looking forward to a Safe and prosperous New Year for our Guild. While I don’t have much to present at this time, I remind everyone that safety should be foremost in your mind when you enter the shop. If you’re not sure what the safest step might be in your work, please reach out to one of the Shop Foremen to get some feedback on what you intend to do. Blood isn’t good for the machines!

Also, the Guild has purchased an

Automatic Electronic Defibrillator (AED) and we will be training all of our Foremen on the proper use of that device throughout the end of January. I pray that we will never have to use it, but I am thankful we will have it available should the need arise.

Finally, if any of you newer members are interested in getting involved, we always have room for a few more at the table on our safety committee. Your ideas and involvement are always welcome.

See you in the shop,
Mike Jones

JANUARY 2019 INTERESTING VIDEOS....

YouTube and other video sites are great resources for woodworkers, here are a few presented in no particular order. Each of these videos caught my or other's eye for various particular reasons, be it the education, the project, or the film itself. If you run across interesting videos, please send a link to me at Library@kcwoodworkersguild.org

Did you know that the Guild has a YouTube channel? The videos below will be on a playlist for ease of watching. Take a look! <https://www.youtube.com/user/kcwoodworkers/>

Enjoy!

How to Build a Queen Size Bed With Drawer Storage (7 Minutes)

https://www.youtube.com/watch?v=_HaQesifkyU

April Wilkerson makes a guest bed frame with pull out drawer storage from plywood. A pretty basic furniture project that is jazzed up with a bit of trim, stain, and fancy drawer pulls.

How to Make a Bird Feeder (11 Minutes)

<https://www.youtube.com/watch?v=EF0nuiz-YYs>

Bob makes a simple squirrel, I mean bird, feeder and shows how to cut glass to make some seed windows. Now that spring is coming, the wildlife will be coming out and feeding. (He also shows a nifty quick trick to find the complementary angles using the offcuts)

Workshop Life Hacks Episode 9: Woodworking Tips and Tricks

<https://www.youtube.com/watch?v=FJn0OxjtEkw>

Colin offers a couple interesting workshop hacks with the main one being an epoxy bottle holder. As the title indicates, there's a few of his workshop hacks that are well worth watching.

Simple Pine End Table (12 Minutes)

<https://www.youtube.com/watch?v=pCjDTscX7YM>

Matt Heere makes a "simple" end table using air dried pine. A cool tip that he demonstrates is how to use shellac as a wood conditioner to prevent stain splotching instead of using the store bought solutions.

How to Make Cabinet Doors with Rail and Stile Router Bits (10 Minutes)

<https://www.youtube.com/watch?v=oVLYeqWSiqg>

Rockler demonstrates some rail and stile router bits to create some frame and panel doors. If you're thinking about refacing your kitchen or refreshing a bathroom, this is a pretty nice introduction into the shaping bits needed along with a tutorial on how to make them safely.

JANUARY 2019-SAFETY REVIEW-THE HAND HELD ROUTER

Router

A router is basically a motor that turns a cutter head at very high speed. It is used to perform an extensive range of smooth finishing and decorative cuts.

Safety Rules

1. Use sharp bits, inspect them before each use, and handle them with care. Never use dull or damaged bits or bits with cracked carbide.
2. Consult a speed chart for the correct speed setting for the bit.
3. Use only bits that have a cutting diameter less than the opening in the router base.
4. Unplug the router when changing a bit.
5. When changing a router bit, insert the new bit as far into the collet as possible, then withdraw it about 3/16" before tightening the collet. Make sure that the bit shaft is engaged in the collet at least 1/2".
6. Always use the wrenches provided with the tool to make adjustments.
7. Be sure that the collet nut and any other adjustment devices are securely tightened before turning the router on. Loose adjustment devices can unexpectedly shift, causing loss of control; loose bits and collets may be thrown violently.
8. Make sure the work surface is free from nails, knots, and other foreign objects. Do not shape particleboard; it could fly apart while being routed.
9. Hold the workpiece securely in a vise or other clamping device. Holding the workpiece by hand is unstable and dangerous.
10. Follow the tool manufacturer's recommendation for the depth of cut.
11. Hold the router firmly with both hands. Motor torque can cause it to twist.
12. Feed the cut against the direction of bit rotation. Feeding the tool in the wrong direction causes the cutting edge of the bit to climb out of the workpiece and may cause loss of control.
13. Never lay the tool down until the motor and bit have come to a complete stop. The spinning bit can grab a surface and pull the tool out of your control.
14. Don't touch the bit immediately after use. It may be hot.
15. Return the bit to the bit holder located in the tool cabinet after use. Never store bits loose in a drawer.

KCWG SCROLL SAW SPECIAL INTEREST GROUP (SIG) EVENT AND CLASS SCHEDULE FOR 2019

- February 23 Introduction to Scroll Saw Class. Maximum 5 people. Fee is 15.00.
- March 23 Easter Sunday Project. Maximum 5 people. Fee is 15.00. Prerequisite: Completion of Intro to Scroll Saw Class is recommended.
- April 20 Fretwork Scroll Saw class. Maximum 5 people. Fee is 15.00. Prerequisite: Completion of Intro to Scroll Saw Class is recommended.
- May 18 Introduction to Scroll Saw Class. Maximum 5 people. Fee is 15.00.
- June 22 Wood Jigsaw Puzzle Class. Maximum 5 people. Fee is 15.00.
Prerequisite: Completion of Intro to Scroll Saw Class is recommended.
- July 20 Introduction to Scroll Saw Class. Maximum 5 people. Fee is 15.00.
- August 24 Open Shop. A chance to get help and ask questions about scrolling.
- September 21 .. Halloween Theme Project. Maximum 5 people. Fee is 15.00.
Prerequisite: Completion of Intro to Scroll Saw Class is recommended.
- October 19 Thanksgiving Day Theme Project. Maximum 5 people. Fee is 15.00. Prerequisite: Completion of Intro to Scroll Saw Class is recommended.

Rough to Ready

A Basic Hands-on Introduction to Woodworking

This class instructs you in the basic techniques and provides the hands-on experience of using table saws, router table, jointer, planer, bandsaw, wide belt sander, miter saw, some good ol' sandpaper as well as various squares and measuring tools. It serves as the only alternative method to satisfy the KCWG'S safety requirements and earn the required Safety Certification necessary to work in the Guild's shops.

This is the perfect one-on-one or one-on-two class for beginners, novices, even as a refresher for experienced woodworkers to build a 9in x 5in x 3 1/2in lidded box with an experienced instructor. Beginning with rough cut lumber your class will progress step by step to create a lidded box, glued up and ready to take home and apply finish after only minor sanding.

All that's required to take the Rough to Ready class is a paid up Sawdust Maker, Woodworker Plus or Benefactor Membership, a completed and passed Online Safety Test (90% passing grade) and your paid tuition for the class. Sign up is simple, just follow this link: <https://www.signupgenius.com/go/20f0b4ca4ac2ea4fb6-rough>.
